

Forensic Psychiatric Hospital

Progress on action plan, including safety actions, as of September 2019

A. Improve patient, staff and public safety

- Thanks to safety initiatives, incidents of patient aggression have dropped by 44 per cent in the last year.
- Twelve bathroom renovations have been completed. We've eliminated fixtures and materials that patients could use to cause harm to themselves or others.

B. Improve clinical-service delivery and patient centred care

- We're in the process of hiring four new Review Board Liaisons. Onboarding will start this month.

C. Strengthen leadership, inter-disciplinary teamwork and professional development

- The Critical Incident Stress Management team at the Forensic Psychiatric Hospital has added an additional 14 members who have completed two days of training. The team is a peer-to-peer support service developed specifically for helping staff deal with traumatic events to ensure ongoing workplace health.
