

Forensic Psychiatric Hospital

**Progress on action plan, including safety actions,
as of July 17, 2019**

A. Improve patient, staff and public safety

- Our clinical security liaison nurses are now working and supporting the clinical teams at the point of care.

B. Improve clinical-service delivery and patient-centred care

- Nursing clinical documentation changes have been implemented across the hospital, including point-of-care risk assessment and structured charting.

C. Strengthen leadership, inter-disciplinary teamwork and professional development

- For the purposes of working more effectively with the BC Review Board, we've posted four new review board liaison positions. They will work as an interdisciplinary team consisting of two nurses and two social workers.
- We held a staff and physician walk-through using patient scenarios to review updated BC Review Board processes and documentation.
