

## Burnaby Centre for Mental Health & Addiction – Partnerships in Care Committee

### Background

Improving the care of people with severe mental health and addictions is vital to a healthy British Columbia. BC Mental Health and Substance Use Services (BCMHSUS) is transforming the way they support people with lived experience, and their family members, across British Columbia. The Partnerships in Care Committee is seeking patient and family voices in the creation, implementation, and evaluation of services directed at BCMHSUS.

Burnaby Centre for Mental Health and Addiction (BCMHA) is a provincial tertiary care facility for adults with severe and concurrent mental health and substance use disorders. People with concurrent disorders in BC are highly underserved, often living with other challenges that further complicate their concurrent disorders and make recovery challenging. BCMHA is the only integrated program of its kind in BC. In 2021, BCMHA will be transferring service to the Red Fish Healing Centre for Mental Health and Addiction on the Riverview Lands in Coquitlam, BC.

### Aim

- Patient and family partners will be a standing member of the committee, responsible for advising on the development of clinical, programming and facilities development, ensuring a client- and family-centered approach
- Patient and family partners may also lead projects and establish time-limited sub-committees as needs are identified. For example, to develop a resource handbook for new families of Burnaby Centre.

### Level of Engagement

This opportunity is at the level of **involve** on the spectrum of engagement ([www.iap2.org](http://www.iap2.org)). The promise to you is that the health care partner will work with you to ensure that your ideas and concerns are reflected in recommendations and provide feedback on how your input affected the decision.

For specific projects, this opportunity is at the level of **collaborate** on the spectrum of engagement.

### Eligibility

Patient and family partners in British Columbia who have experience with residential level care for mental health and addictions, either as a family member or a person with lived experience.

### Logistics
